

ABRASIVE DISTRIBUTION

SAM

Objective

An abrasive distribution system that ensures a reliable feed and an accurate proportioning.

This system ensures:

- An improved productivity thanks to a steady and accurate abrasive flow rate, which allows increasing the cutting speed
- Lower running costs thanks to an optimized abrasive consumption, which reduces the wear of the cutting-head components
- An improved availability rate of the machine thanks to a system cutting autonomy of over 100 hours
- An enhanced reliability of the installation as the system warns you when running out of abrasive

We resell Australian or Indian sable (in stock).
